

MD pocket[®]

August 2017

Medical Reference Guides | Clipboards | Pocket Equipment | Books | Calipers

About MDpocket:

MedInfo, Inc. and its associated trade names (MDpocket, WhiteCoat Clipboards, Clipboards.com) is a publisher of professional and scholarly medical books and reference guides. Our publications include all medical specialties and subspecialties and aim to provide all healthcare professionals with the most up-to-date medical references. Our product line is designed to give our customers compact and easy to use medical products and references.

Table of Contents:

MDpocket Product Display and Packaging Options	2
MDpocket Resident Edition 2017	4
MDpocket Student Edition 2017	5
MDpocket Radiology and Imaging Edition	6
DOpocket Osteopathic Edition 2017	7
NPpocket Nursing Edition 2017	8
MDpocket Neurology Edition	9
MDpocket Skilled Nursing Facilities Edition 2017	10
MDpocket Pediatric Edition 2017	11
MDpocket Physician Assistant Clinical/Outpatient Edition 2017	12
MDpocket Physician Assistant ER/Inpatient Edition 2017	13
Medical Student Mini Edition, Notes Pages, Pocket Pages	14
EKG Calipers and Tuning Fork	15
Reflex Hammers	16
Nurse Pocket, Nursing Packs, and Scissors	17
Stethoscope Timer, Name Tags, Stethoscope Lights, and Stethoscope Hip Clips	18
Cell Phone Stand, Metallic Penlights, Highlighter Pen, and Courier Bag	19
Penlights with Styluses and Pinkback Buttons	20
ID Badge Holder, Lanyards, and ID Badge Reels	21
Rapid ID Reference Cards	22
EKG Cards and Neonatal Wheels	26
Neonatal Wheels, Pregnancy Wheel, and BMI Wheel	27
ACLS Card Set, PALS Card Set, BLS Card, and Newborn Resuscitation Card	28
Card Combo Packs and Acute Care Card Set	29
Sepsis Card, H&P Cards, Immunization Cards, and Pressor Card	30
Clipboard Accessories	31
Clipboard Accessories, Pocket Clipboards	32
Pocket Clipboards, Novel Clipboards	33
ISO Clipboards, iPad Mini Clipboards	34
Diamond Plate Clipboards, Double Feature Lapboards, Storage Clipboards	35
Server Clipboards, Memo Clipboards	36
Letter Clipboards, Legal Clipboards, 11x17 and 17x11 Ledger Clipboards	37
WhiteCoat Clipboard Accessories	38
Medical WhiteCoat Clipboard Label	39
Nursing WhiteCoat Clipboard Label	40
Respiratory WhiteCoat Clipboard Label	41
Pediatric-Infant WhiteCoat Clipboard Label	42
Pharmacy WhiteCoat Clipboard Label	43
Anesthesia WhiteCoat Clipboard Label	44
EMT WhiteCoat Clipboard Label	45
Physical Therapy WhiteCoat Clipboard Label	46
Chemistry WhiteCoat Clipboard Label	47
Dental WhiteCoat Clipboard Label	48
Clipboard Size Comparison	49
Notepads	50

PACKAGING AND DISPLAYS

MDpocket offers a variety of ways to display its products. Freestanding and table top displays are available in several sizes and configurations. Contact your sales representative with any packaging or display questions, requests, or to determine how MDpocket products will look in your store!

MDpocket has upgraded its retail packaging to offer a superior retail presence for your store. Many items now feature our unique retail boxes to help them stand out on your shelves and offer a complete branded experience for your customers.

MDpocket Medical Student Edition - 2017

The Student Edition contains the most used information by today's medical students. Pocket-sized, comprehensive, and specifically designed to meet the demands of all students throughout their medical school years.

Contents:

- Complete history and physical exam guidance with descriptors to help you write a great H&P exam
- Mini mental status exam
- Dermatome map
- Glasgow Coma Scale
- How to write admission orders
- Examples of preoperative, operative, and postoperative notes
- Examples of general SOAP, peds, neurological, and procedure notes
- Chapman reflexes
- Commonly used replacement fluids
- Commonly used equations
- Rulers in centimeters and inches
- Eye chart
- Newborn reflexes and weights
- Insulin actions
- Acute renal failure
- Antibigram
- USPSTF screening guidelines
- Autonomic reflexes
- ...and much more!

Spiral ISBN-13: 978-1-943991-68-6

Retail Spiral Price: \$21.95

Wholesale Spiral Price: \$14.27

Deep Tendon Reflexes

Reflex	Location	Spinal Level
Biceps	Anterior arm	C5, C6
Brachioradialis	Anterior forearm	C5, C6
Triceps	Posterior arm	C6, C7
Supinator	Posterior forearm	C6, C7
Wrist	Distal forearm	C6, C7
Hand	Distal forearm	C6, C7
Elbow	Distal forearm	C6, C7
Forearm	Distal forearm	C6, C7
Wrist	Distal forearm	C6, C7
Hand	Distal forearm	C6, C7
Elbow	Distal forearm	C6, C7
Forearm	Distal forearm	C6, C7

Abnormal responses listed here:

- Babinski: great toe will extend & other toes fan out
- Asterixis: flapping hands (jerking movement) with wrist extended
- Clonus: rhythmic, muscle contractions or beats (reflex inflated)
- Meningeal Signs: Kernig - thigh is bent at the hip, knee at 90 degree angle, and subsequent ext of knee is painful; Brudzinski - involuntary lifting of the legs when lifting a patient's head off bed

Grading of Motor Strength

Grading: 0-5 scale. Many use + or - toward stronger/weaker end of scale.

0/0: No muscle contraction detected; flaccid

1/0: No movement
Barely detectable contraction by sight/palpation

2/0: Can move in horizontal plane
Active movement in gravity-less plane

3/0: Active movement against gravity only

4/0: Active movement against gravity; some resistance

5/0: Normal strength
Active movement against full resistance without fatigue

MOTOR STRENGTH TESTING

Patterns of weakness can help localize a lesion to a particular cortical or white matter region, spinal cord level, nerve root, peripheral nerve, or muscle. Test the strength of each muscle group and record it in a systematic fashion.

Assess and compare bilateral at bulk, tone, and strength:

- **Bulk:** atrophy, fasciculations
- **Tone:** resistance to passive stretch

STRENGTH TESTING AND LOCATION

Test	Muscle	Area	Location
Upper Arm	Flexion	Biceps	C5, C6
	Extension	Triceps	C6-C8
Grip	Finger flexion	Hand	C7, C8, T1
Wrist	Extension	Radial nerve	C6-C8
	Abduction	Ulnar nerve	C8, T1
Finger	Abduction	Ulnar nerve	C8, T1
	Opposition	Median nerve	C8, T1
Hip	Flexion	Iliopsoas	L2-L4
	Extension	Gluteus maximus	S1
	Adduction	Adductors	L2-L4
	Abduction	Gluteus medius and minimus	L4, L5, S1
Knee	Flexion	Hamstrings	L4, L5, S1, S2
	Extension	Quadriceps	L2-L4
Foot	Dorsiflexion	Anterior lower leg	L4, L5
	Plantar flexion	Posterior lower leg	S1

DEEP TENDON REFLEX TESTING

Test and compare reflexes bilaterally

Grading: 0 to 4+ Scale

- 4+: hyperactive with clonus
- 3+: hyperactive (sustained)
- 2+: normal, average
- 1+: diminished, low normal
- 0: no response

Other Reflexes

Abnormal responses listed here:

- Babinski: great toe will extend & other toes fan out
- Asterixis: flapping hands (jerking movement) with wrist extended
- Clonus: rhythmic, muscle contractions or beats (reflex inflated)
- Meningeal Signs: Kernig - thigh is bent at the hip, knee at 90 degree angle, and subsequent ext of knee is painful; Brudzinski - involuntary lifting of the legs when lifting a patient's head off bed

Main Spinal Nerve Root Involved

Reflex	Spinal Level
Biceps	C5, C6
Brachioradialis	C5, C6
Triceps	C6, C7
Supinator	C6, C7
Wrist	C6, C7
Hand	C6, C7
Elbow	C6, C7
Forearm	C6, C7

CEREBELLAR FUNCTION

Balance and coordination: Coordination of movement is a complex process involving both sensory afferent information regarding proprioception and muscle efferent output.

Assessment Techniques

1. **Romberg test:** tests proprioception/cerebellar function
 - Ask patient to stand feet together with eyes closed and arms at sides. Positive if loss of balance occurs.
2. **Finger-to-nose (FTN) test:** evaluates ataxia
 - Ask the patient to alternately point from their nose to the examiner's finger at different locations.
3. **Heel-to-shin (HTS) test:** evaluates coordination
 - Ask the patient to run the heel of one foot along the shin of the opposite leg.

Vertebral Body Landmarks

Landmark	Spinal Level	Approximate Location
Thyroid cartilage	C4-C5	Level of larynx
Manubrium of sternum	T4-T5	Level of umbilicus
Angle of Louis	T4-T5	Level of umbilicus
Xiphoid process	T10	Level of umbilicus
Pubic symphysis	L4-L5	Level of umbilicus

MDpocket Radiology and Imaging Edition

Pocket size medical reference that details what imaging studies to order based on body part, indications, and the use of contrast. Each section includes detailed charts to help you select the correct radiologic study for CT scans, MRIs, Interventional Radiology, Nuclear Medicine, Ultrasounds, and X-rays.

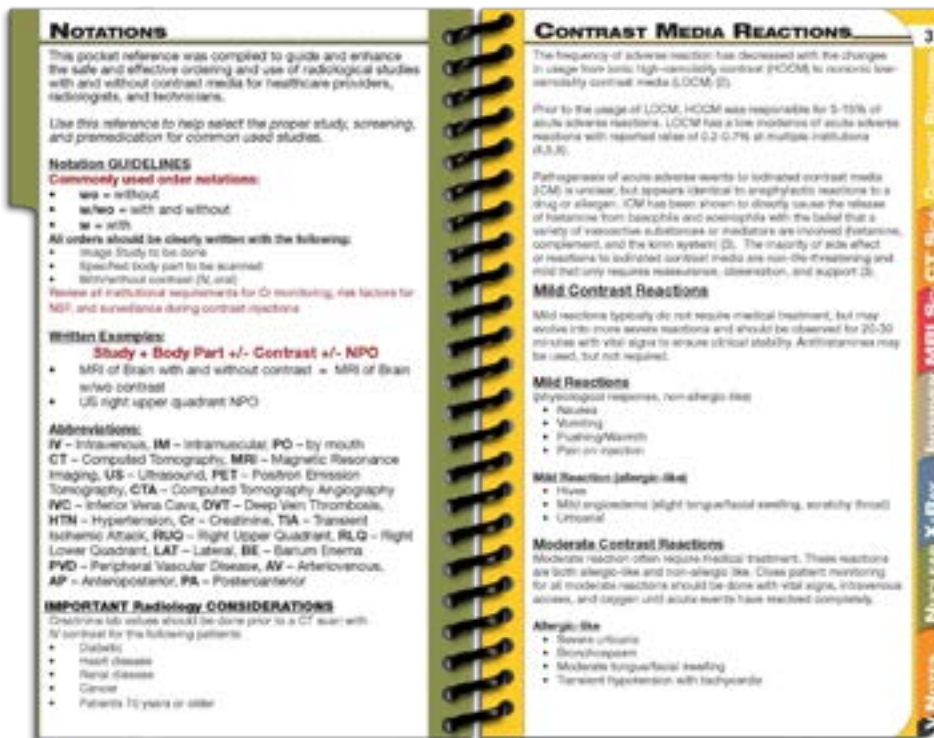

Contents:

- Area for your radiology phone numbers
- Notations guidelines for ordering radiology studies
- Detailed section on contrast media reactions
- Contrast allergy protocols
- Protocol in pediatric contrast allergies
- Extravasation of contrast categories
- Nephrogenic Systemic Fibrosis (NSF)
- Important considerations section for each type of study
- Patient preparation for each type of study
- Eye chart
- Ruler in centimeters and inches
- ...and much more!

Spiral ISBN-13: 978-1-943991-75-4

Retail Spiral Price: \$19.95

Wholesale Spiral Price: \$12.97

DOpocket Osteopathic Edition - 2017

The Osteopathic Edition is packed full of specific material for the osteopathic student. Pocket-sized, comprehensive, and specifically designed to meet the demands of all DO students during their training.

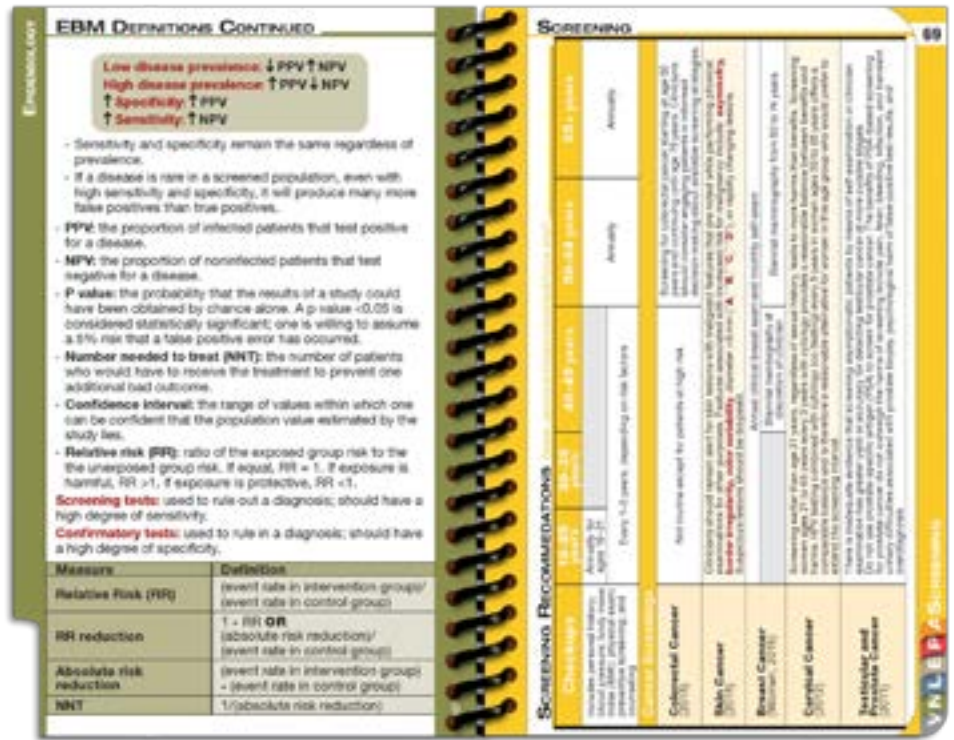

Contents:

- Complete history and physical exam with descriptors to help you write a great osteopathy-specific H&P
- Mini mental status exam
- Dermatome map
- Glasgow Coma Scale
- How to write an admission order
- Sample preoperative, operative, and postoperative notes
- Sample SOAP, peds, neurological, and procedure notes
- Chapman reflexes
- Commonly used replacement fluids
- Hyponatremia algorithm for management
- Conversions of narcotics, temperatures, weights, and volumes
- APGAR scoring
- Lab values
- ACLS guidelines
- PALS guidelines
- USPTFS screening recommendations
- Newborn reflexes and weights
- Autonomic reflexes
- ...and much more!

Spiral ISBN-13: **978-1-943991-73-0**

Retail Spiral Price: \$25.95

Wholesale Spiral Price: \$16.87

NPpocket Nursing Edition - 2017

NPpocket contains pocket medical information used by today's nurses, nurse practitioners and other allied nursing fields.

Contents:

- History and physical exam section
- Injection sites for intramuscular, subcutaneous and intradermal
- Specialized and modified diet sections
- Cardiac auscultation points
- EKG interpretation with QRS diagram, rate, rhythm, blocks, arrhythmias
- Dermatome Map
- Mini mental status exam
- Guidelines for potassium replacement
- Electrolyte replacement for calcium, phosphate, magnesium
- Replacement fluids chart with maintenance fluid calculations
- Acute renal failure algorithm
- Hyponatremia algorithm
- Nausea, vomiting, and diarrhea medications with side effects
- Pain medications with onset, peak, duration and dose
- Steroid medications and equivalents
- Diagnosis and treatment of heart failure
- Diabetes checklist for management
- Immunizations schedule
- Blood-Plasma-Serum lab values
- Drugs that cannot be crushed section
- Blank notes pages
- ...and much more!

Spiral ISBN-13: **978-1-943991-69-3**

Retail Spiral Price: \$24.95

Wholesale Spiral Price: \$16.22

RIGHT SIDE EKG PLACEMENT

Cardiac Auscultation Points

Aorta:

- 2nd ICS
- Right Sternal Border

Pulmonary:

- 2nd ICS
- Left Sternal Border

Erb's Point:

- 3rd ICS
- Sternal Border

Mitral:

- 5th ICS
- Left Lower Sternal Border

EKG INTERPRETATION

Interpretation

- **Rate**
- **Rhythm**
- **Axis**
- **Intervals (PR, QRS, QT)**
- **Hypertrophy**
- **Ischemia/Infarct/Injury**

Normal Values

- **P wave:** <0.11 sec
- **PR interval:** 0.12-0.20 sec (x1 large box)
- **QRS interval:** <0.12 seconds (x3 small boxes)
- **QT:** varies with heart rate, less than half of the R-R interval
- **QTc interval:** 0.33-0.47 sec

EKG Paper

EKG Paper **Large Box** **Small Box**

Voltage

Duration

Amplitude

5 mm = 0.2 sec 1 mm = 0.04 sec

• Paper moves at 25 mm/sec, 300 big boxes/min

• **Small box:** 1 mm high x 1 mm wide: 0.04 sec

• **Large box:** 5 mm high x 5 mm wide: 0.2 sec

• 1 small box vertical = 0.1 mV

Rate

• Count each large box from one QRS to the next QRS as: 300, 150, 100, 75, 60, 50, 42 (bpm)

Or

• Divide 300 by the number of large boxes between R waves (eg. 300/4 boxes = 75 bpm)

Arrhythmia	ECG Characteristics	Associated Disorders
Normal Sinus Rhythm	Regular rhythm, P wave before each QRS, PR interval 0.12-0.20 sec, QRS narrow, QT interval <0.44 sec	None
Sinus Bradycardia	Regular rhythm, P wave before each QRS, PR interval 0.12-0.20 sec, QRS narrow, QT interval <0.44 sec, HR < 60 bpm	None
Sinus Tachycardia	Regular rhythm, P wave before each QRS, PR interval 0.12-0.20 sec, QRS narrow, QT interval <0.44 sec, HR > 100 bpm	None
Sinus Arrhythmia	Regular rhythm, P wave before each QRS, PR interval 0.12-0.20 sec, QRS narrow, QT interval <0.44 sec, HR varies with respiration	None
First Degree AV Block	Regular rhythm, P wave before each QRS, PR interval > 0.20 sec, QRS narrow, QT interval <0.44 sec	None
Second Degree AV Block (Mobitz I)	Regular rhythm, P wave before each QRS, PR interval 0.12-0.20 sec, QRS narrow, QT interval <0.44 sec, PR interval progressively lengthens until a QRS is dropped	None
Second Degree AV Block (Mobitz II)	Regular rhythm, P wave before each QRS, PR interval 0.12-0.20 sec, QRS narrow, QT interval <0.44 sec, QRS is dropped without PR interval lengthening	None
Third Degree AV Block	Regular rhythm, P wave and QRS are dissociated, PR interval 0.12-0.20 sec, QRS narrow, QT interval <0.44 sec	None
Bundle Branch Block	Regular rhythm, P wave before each QRS, PR interval 0.12-0.20 sec, QRS wide, QT interval <0.44 sec	None
Left Bundle Branch Block	Regular rhythm, P wave before each QRS, PR interval 0.12-0.20 sec, QRS wide, deep S wave in V1, V2, V3, QT interval <0.44 sec	None
Right Bundle Branch Block	Regular rhythm, P wave before each QRS, PR interval 0.12-0.20 sec, QRS wide, M-shaped S wave in V1, V2, V3, QT interval <0.44 sec	None
Complete Heart Block	Regular rhythm, P wave and QRS are dissociated, PR interval 0.12-0.20 sec, QRS wide, QT interval <0.44 sec	None
Wenckebach	Regular rhythm, P wave before each QRS, PR interval 0.12-0.20 sec, QRS narrow, QT interval <0.44 sec, PR interval progressively lengthens until a QRS is dropped	None
Pre-excitation	Regular rhythm, P wave before each QRS, PR interval < 0.12 sec, QRS narrow, QT interval <0.44 sec	None
ST Segment Elevation	Regular rhythm, P wave before each QRS, PR interval 0.12-0.20 sec, QRS narrow, ST segment elevated, QT interval <0.44 sec	Myocardial Infarction
ST Segment Depression	Regular rhythm, P wave before each QRS, PR interval 0.12-0.20 sec, QRS narrow, ST segment depressed, QT interval <0.44 sec	Myocardial Ischemia
QT Prolongation	Regular rhythm, P wave before each QRS, PR interval 0.12-0.20 sec, QRS narrow, QT interval > 0.44 sec	None
QT Shortening	Regular rhythm, P wave before each QRS, PR interval 0.12-0.20 sec, QRS narrow, QT interval < 0.33 sec	None

ECG Finding	ECG Characteristics	Associated Disorders
Normal Sinus Rhythm	Regular rhythm, P wave before each QRS, PR interval 0.12-0.20 sec, QRS narrow, QT interval <0.44 sec	None
Sinus Bradycardia	Regular rhythm, P wave before each QRS, PR interval 0.12-0.20 sec, QRS narrow, QT interval <0.44 sec, HR < 60 bpm	None
Sinus Tachycardia	Regular rhythm, P wave before each QRS, PR interval 0.12-0.20 sec, QRS narrow, QT interval <0.44 sec, HR > 100 bpm	None
Sinus Arrhythmia	Regular rhythm, P wave before each QRS, PR interval 0.12-0.20 sec, QRS narrow, QT interval <0.44 sec, HR varies with respiration	None
First Degree AV Block	Regular rhythm, P wave before each QRS, PR interval > 0.20 sec, QRS narrow, QT interval <0.44 sec	None
Second Degree AV Block (Mobitz I)	Regular rhythm, P wave before each QRS, PR interval 0.12-0.20 sec, QRS narrow, QT interval <0.44 sec, PR interval progressively lengthens until a QRS is dropped	None
Second Degree AV Block (Mobitz II)	Regular rhythm, P wave before each QRS, PR interval 0.12-0.20 sec, QRS narrow, QT interval <0.44 sec, QRS is dropped without PR interval lengthening	None
Third Degree AV Block	Regular rhythm, P wave and QRS are dissociated, PR interval 0.12-0.20 sec, QRS narrow, QT interval <0.44 sec	None
Bundle Branch Block	Regular rhythm, P wave before each QRS, PR interval 0.12-0.20 sec, QRS wide, QT interval <0.44 sec	None
Left Bundle Branch Block	Regular rhythm, P wave before each QRS, PR interval 0.12-0.20 sec, QRS wide, deep S wave in V1, V2, V3, QT interval <0.44 sec	None
Right Bundle Branch Block	Regular rhythm, P wave before each QRS, PR interval 0.12-0.20 sec, QRS wide, M-shaped S wave in V1, V2, V3, QT interval <0.44 sec	None
Complete Heart Block	Regular rhythm, P wave and QRS are dissociated, PR interval 0.12-0.20 sec, QRS wide, QT interval <0.44 sec	None
Wenckebach	Regular rhythm, P wave before each QRS, PR interval 0.12-0.20 sec, QRS narrow, QT interval <0.44 sec, PR interval progressively lengthens until a QRS is dropped	None
Pre-excitation	Regular rhythm, P wave before each QRS, PR interval < 0.12 sec, QRS narrow, QT interval <0.44 sec	None
ST Segment Elevation	Regular rhythm, P wave before each QRS, PR interval 0.12-0.20 sec, QRS narrow, ST segment elevated, QT interval <0.44 sec	Myocardial Infarction
ST Segment Depression	Regular rhythm, P wave before each QRS, PR interval 0.12-0.20 sec, QRS narrow, ST segment depressed, QT interval <0.44 sec	Myocardial Ischemia
QT Prolongation	Regular rhythm, P wave before each QRS, PR interval 0.12-0.20 sec, QRS narrow, QT interval > 0.44 sec	None
QT Shortening	Regular rhythm, P wave before each QRS, PR interval 0.12-0.20 sec, QRS narrow, QT interval < 0.33 sec	None

MDpocket Neurology Edition

The Neurology Edition is ideal for all neurology students and residents with its compact design and easy to use tabbed index.

Contents:

- Status Epilepticus management and treatment
 - Neurology drugs with dose, levels, and contraindications
 - Anti-Epileptic drugs with target levels, doses and side effects
 - Stroke mimics and clinical features
 - NIH Stroke Scale
 - EMG conduction
 - IVIG dosing and side effects
 - MRI modalities
 - Lumbar puncture procedure
 - Tumors that spread and where
 - Meningitis CSF testing
 - Ataxia management and testing
 - Parkinson's symptoms and treatment
 - Radiculopathies and small fiber neuropathies
 - Cranial nerve components and lesions
 - Cranial nerve palsies
 - Vertigo
 - Pain management with dosing
 - Visual field pathways with lesions
 - Plexus diagrams (Lumbosacral and Brachial)
- ...and much more!

Spiral ISBN-13: 978-1-943991-74-7

Retail Spiral Price: \$26.95

Wholesale Spiral Price: \$17.52

MDpocket Physician Assistant ER/Inpatient Edition - 2017

The ER/Inpatient Physician Assistant guide from MDpocket contains detailed pocket medical information needed by PAs working in a hospital or emergency department.

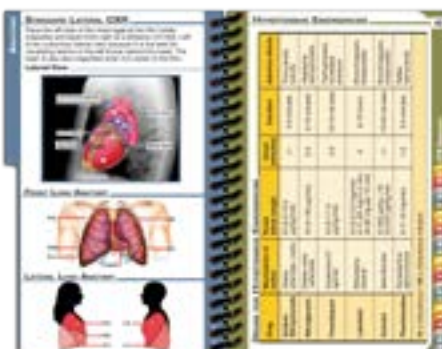

Contents:

- Conversion for weight, height, temperature
- Contacts page to keep your numbers organized
- History and Physical Exam write-up sections with descriptors
- Rapid intubation medications
- Sepsis/SIRS Bundle with treatment algorithm
- Treating community acquired pneumonia with *Pseudomonas* risk factors
- HAP, VAP, HCAP treatment guidelines
- Heart failure treatment
- Stroke guidelines and management
- NIH Stroke Scale
- Drugs for hypertension emergencies
- Hypertension management (JNC 8 guidelines)
- Acid base analysis
- Lacerations guide and suture diagrams
- Chest X-ray anatomy and interpretations
- Writing notes-delivery, intrapartum, surgery, procedures, preop, op, postop ...and much more!

Spiral ISBN-13: 978-1-943991-72-3

Retail Spiral Price: \$28.95

Wholesale Spiral Price: \$18.82

ABGs

ACID BASE

NORMAL ABG VALUES

Normal arterial pH range: 7.38 - 7.46 (7.40)
 Normal arterial PaCO₂ range: 38 - 45 mmHg (40 mmHg)
 Normal serum bicarb range: 24 - 30 mEq/L

Arterial O₂ (on 100% O₂) range: 100 mmHg (100 mmHg)

Primary Disorder	pH	HCO ₃ ⁻	PaCO ₂	Expected Compensation
Metabolic Acidosis	↓	↓	↓	PaCO ₂ ↓ by 1.2 x HCO ₃ ⁻
Metabolic Alkalosis	↑	↑	↑	PaCO ₂ ↑ by 0.75 x HCO ₃ ⁻
Respiratory Acidosis	↓	↑	↑	HCO ₃ ⁻ ↑ by 0.2 x PaCO ₂ acute HCO ₃ ⁻ ↑ by 0.4 x PaCO ₂ chronic
Respiratory Alkalosis	↑	↓	↓	HCO ₃ ⁻ ↓ by 0.2 x PaCO ₂ acute HCO ₃ ⁻ ↓ by 0.4 x PaCO ₂ chronic

Acid/Base Analysis Steps: 8 Step approach

1. Acidemia or alkalemia (pH 7.35 - 7.45) (if pH < 7.2 and difficulty keeping up respirations, consider starting HCO₃⁻ pH)
2. 1st respiratory or metabolic?
 - if pCO₂ > 40 → respiratory acidosis
 - if pCO₂ < 40 and HCO₃⁻ < 24 → metabolic acidosis
3. If respiratory disturbance: is it acute or chronic?
 - Acute: For 10 mmHg change in pCO₂, → 0.08 change in pH.
 - Chronic: For 10 mmHg change in pCO₂, → 0.03 change in pH.
4. If Metabolic Acidosis is there an AG or non-AG?
 - AG if × 12
 - if hypalbuminemia expected AG lower: Expected AG = 12 - (2.5 × albumin)
5. Appropriate respiratory compensation if metabolic disturbance?
 - Winter's: Expected pCO₂ = (1.5 × HCO₃⁻) + (8 ± 2) if not appropriate, may be superimposed respiratory acidosis or alkalosis.
6. If AG, other metabolic disorders?
 - Corrected HCO₃⁻ is measured HCO₃⁻ + (AG - 12). NE 24
 - if corrected HCO₃⁻ > 24 → superimposed metabolic alkalosis? (vomiting)
 - if corrected HCO₃⁻ < 24 → superimposed NAGMA (Diarrhea)

ACID BASE ANALYSIS - SIMPLE

1. Acidemic (pH < 7.35) or Alkalemic (pH > 7.45)?
2. Is the primary process metabolic (change HCO₃⁻) or respiratory (change pCO₂)?
3. If metabolic acidosis, gap or non-gap?
 - Anion gap = [Na⁺] - [Cl⁻] + [HCO₃⁻] (normal 10 - 14 mEq/L)
4. Is compensation appropriate?
 - if yes, simple disorder. If no, mixed disorder.
5. Calculate change from pCO₂ = 40 and HCO₃⁻ = 24

Primary Disorder	Expected Compensation
Metabolic Acidosis	↓ pCO ₂ 1.2 x change in HCO ₃ ⁻ OR use Winter's formula - pCO ₂ = (1.5 × HCO ₃ ⁻) + (8 ± 2) and compare to actual - if higher than expected it is also respiratory acidosis - if lower than expected it is also respiratory alkalosis
Metabolic Alkalosis	↑ pCO ₂ 0.75 x change in HCO ₃ ⁻
Respiratory Acidosis -acute	↑ HCO ₃ ⁻ 0.1 x change in pCO ₂ (HCO ₃ ⁻ rises 1 for every 10 elevation pCO ₂)
Respiratory Acidosis -chronic	↑ HCO ₃ ⁻ 0.04 x change in pCO ₂ (HCO ₃ ⁻ rises 3.8 for every 10 elevation pCO ₂)
Respiratory Alkalosis -acute	↓ HCO ₃ ⁻ 0.02 x change in pCO ₂ (HCO ₃ ⁻ drops 2 for every 10 decrease pCO ₂)
Respiratory Alkalosis -chronic	↓ HCO ₃ ⁻ 0.04 x change in pCO ₂ (HCO ₃ ⁻ drops 3 for every 10 decrease pCO ₂)

1 MDpocket MRG: Medical Student Mini Edition

MDpocket mini provides a more compact version of our Medical Student Reference Guide for those who only want the essentials. This guide provides students with all the basics and a little extra at a great price. This reference is packed with the most daily used medical information used by today's students and includes quick and easy ways to take care of patients.

ISBN-13: **978-0-9889269-7-4**

Retail Price: \$7.95

Wholesale: \$5.17

2 Extra Notes Page

Add extra notes pages to write all your important information on and take with you. All pages are prelined and tabbed to fit **any** of our medical reference guides.

Model **8756**

MSRP	10-49	50-99	100+
\$0.75	\$0.64	\$0.60	\$0.57

3 Pocket Page

Add a pocket page to any of our reference guides to store important small sheets, medical information or important phone numbers. Pocket pages can be added to **any** of our medical reference guides.

Model **8755**

MSRP	10-49	50-99	100+
\$1.00	\$0.85	\$0.80	\$0.75

ADD TO ANY BOOK!

1 Pocket Penguin EKG Calipers

Compact durable pocket size EKG calipers with a distinctive look and feel. Get one of the best pocket calipers made. Small enough to fit in any pocket, these EKG calipers are easy-to-use, fully adjustable, and guaranteed to last with their powder coated nickel plated light weight aluminum.

3.75" L / 0.4 oz.

Black 6011	Orange 6016
Silver 6017	Red 6010
White 6014	Pink 6005
Blue 6020	Lilac 6018
Green 6007	Wine 6019
Teal 6013	Lime Green 6000
Yellow 6008	

MSRP	10-49	50-99	100+
\$21.95	\$18.66	\$17.56	\$16.47

2 Basic EKG Calipers

These basic pocket EKG calipers featuring chrome-plated tips and hardened steel handles to enable easy manipulation.

4.75" L / 0.8 oz.

Model **6004**

MSRP	10-49	50-99	100+
\$9.95	\$8.45	\$7.95	\$7.45

3 512 cps Tuning Fork

These forks boast high accuracy (+/-0.05%) and are great for performing Rinne & Weber hearing tests and screening patients for diabetic neuropathy and other sensory conditions.

- Constructed from a single piece of hardened steel
- Weldless design to maximize structural integrity for a lifetime of use

Model **6052**

MSRP	10-49	50-99	100+
\$6.95	\$5.90	\$5.55	\$5.20

1 Taylor Reflex Hammer

This classic Taylor pocket-size reflex hammer features:

- Triangular shaped and flat rubber head for reflex testing
- Dimensions of 7 1/2" long and 3/8" thick with a 2" wide hammer head
- Pointed chrome shaft for testing Babinski responses

Blue Model **6050-BLU**
Black Model **6050-BLK**

MSRP	10-49	50-99	100+
\$3.95	\$3.35	\$3.15	\$2.95

2 Buck Reflex Hammer

Test all reflexes and sensations with this hammer and combined attachments featuring:

- Two heads to test even the most subtle reflexes
- Removable brush for testing sensation loss or neuropathy
- Sharp pin prick testing with removable needle point
- Entire hammer is 7.25" long

Model **6058**

MSRP	10-49	50-99	100+
\$6.95	\$5.90	\$5.55	\$5.20

3 Babinski Reflex Hammer

Test patient reflexes with this compact pocket hammer. Head is removable and attaches in two orientations to suit your preference.

- Removable pointed end piece for pinprick and other sensation testing
- Tough round rubber head

4 Cyanotic Congenital Heart Disease Wheel

Includes commonly seen cyanotic congenital heart diseases and allows you to apply the American Academy of Pediatrics recommended Pulse Oximetry Test and the Oxygen Challenge Test in your assessments. This wheel shows all the necessary steps to evaluate CCHD clinical features including, chest X-rays and EKGs in making a diagnosis prior to Cardiology consultation and Echocardiography.

Model **4212**

MSRP	10-49	50-99	100+
\$6.95	\$5.90	\$5.55	\$5.20

5 Neonatal Pulse Oximetry Wheel

This wheel is an educational tool to help assess for Critical Congenital Heart Disease (CCHD) in neonates. Pulse Oximetry has been recommended by the American Academy of Pediatrics and the American Heart Association to identify hypoxemia that might not otherwise produce visible cyanosis, especially among darkly pigmented newborns.

Model **4211**

MSRP	10-49	50-99	100+
\$5.95	\$5.05	\$4.75	\$4.45

1 

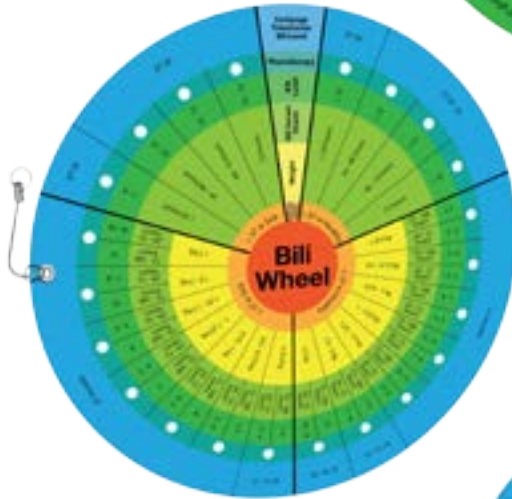

1 Neonatal Hypoglycemia Wheel

This wheel provides a practical guide and algorithm for screening and subsequent management of neonatal hypoglycemia with a goal target glucose screen ≥ 45 mg/dL prior to routine feedings.

Model 4213

MSRP	10-49	50-99	100+
\$6.95	\$5.90	\$5.55	\$5.20

2 

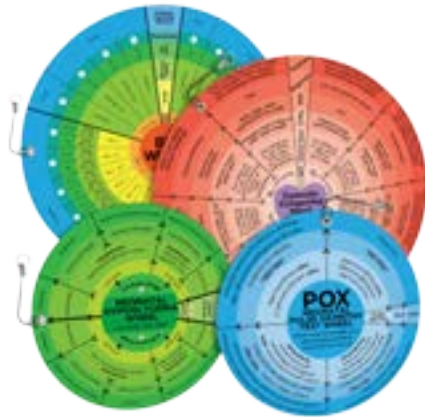

2 Neonatal Bili Wheel

Use this wheel to guide therapy for neonates with hyperbilirubinemia. There are 6 circles for providers to categorize neonates of a certain gestational age in the treatment of hyperbilirubinemia including those infants who have hemolytic disease of the newborn such as RH disease, ABO or other blood group incompatibility with coombs positive status, presence of sepsis, hypoxemia, acidosis, or low albumin level of ≤ 2.5 mg/dL.

Model 4214

MSRP	10-49	50-99	100+
\$6.95	\$5.90	\$5.55	\$5.20

3 

3 Neonatal Wheel Combo Pack

A wheel combo pack with all four neonatal wheels.

Model 4301

MSRP	10-49	50-99	100+
\$17.99	\$15.29	\$14.39	\$13.50

4 

4 Pregnancy Wheel

Get all the important pregnancy dates in a small pocket wheel that features:

- Dates to help determine the estimated due date using the first day of the last menstrual period or the probable date of conception
- Fetus crown rump length measurements
- Biparietal diameter (BPD) measurements

Model 4203

MSRP	10-49	50-99	100+
\$4.95	\$4.20	\$3.95	\$3.70

5 

5 BMI Calculator Wheel

Calculate the body mass index (BMI) of patients with this pocket BMI wheel calculator that will fit in your pocket.

Model 4210

MSRP	10-49	50-99	100+
\$4.95	\$4.20	\$3.95	\$3.70

1 ACLS Card Set

ACLS pocket reference cards are ideal for quick reviews of the diagnosis and treatment of the latest 5 major ACLS algorithms:

- Universal ACLS Algorithm
- Pulseless Electrical Activity
- Bradycardia
- Ventricular Tachycardia and Fibrillation
- Unstable Tachycardia
- Asystole
- ACLS medications

Model 4201

MSRP	10-49	50-99	100+
\$9.99	\$8.50	\$7.99	\$7.50

2 PALS Card Set

Laminated pocket card set with latest acute care pediatric algorithms. This 3 card set has easy-flow algorithms to guide you through the most daily used pediatric life support measures. Included within the set of card: Universal PALS Algorithm, Pediatric Bradycardia Algorithm, Pediatric Tachycardia Algorithm, and more!

Model 4205

MSRP	10-49	50-99	100+
\$9.99	\$8.50	\$7.99	\$7.50

3 Adult Basic Life Support Card (BLS)

Laminated pocket card provides the latest Basic Life Support (BLS) guidelines for Adults. The front of this card provides the BLS algorithm for unresponsive victims. Flip the card over to review all the CPR components for providers, such as compression ratios/depths, hand placement, and 1 or 2 rescuer guidelines for infants, children, adolescents, and adults.

Model 4215

MSRP	10-49	50-99	100+
\$6.95	\$5.90	\$5.55	\$5.20

4 Newborn Resuscitation Algorithm Card

Laminated pocket card provides the latest Newborn Resuscitation Algorithm and Cardiopulmonary Resuscitation (CPR) guidelines. The front of this card features the Newborn Resuscitation Algorithm and on the back are all the CPR components for providers (compression ratios/depths, hand placement, and 1 or 2 rescuer guidelines for infants, children, adolescents, and adults).

Model 4216

MSRP	10-49	50-99	100+
\$6.95	\$5.90	\$5.55	\$5.20

1 ACLS & PALS Combo

A card combo pack that includes all cards from the ACLS and PALS sets.

Model **4300**

MSRP	10-49	50-99	100+
\$17.99	\$15.30	\$14.40	\$13.50

2 ACLS & BLS Combo

A card combo pack that includes all cards from the ACLS set and the BLS card.

Model **4302**

MSRP	10-49	50-99	100+
\$15.25	\$12.97	\$12.20	\$11.45

3 Newborn Resuscitation & PALS Combo

A card combo pack that includes all cards from the PALS set and the Newborn Resuscitation Card.

Model **4303**

MSRP	10-49	50-99	100+
\$15.25	\$12.97	\$12.20	\$11.45

4 ACLS, PALS & BLS Combo

A card combo pack that includes all cards from the ACLS and PALS sets, as well as the BLS Card.

Model **4304**

MSRP	10-49	50-99	100+
\$24.25	\$20.62	\$19.40	\$18.19

5 Acute Care Card Set

Use these pocket card references for resuscitation guidelines, intubation medications, endotracheal tube sizes, and much more. These cards have been tried and tested by the University of Michigan and used by hospitalists, pediatricians, anesthesiology residents, fellows in critical care, and emergency medicine physicians.

Model **4207**

MSRP	10-49	50-99	100+
\$9.99	\$8.50	\$7.99	\$7.50

1 Sepsis Card

This pocket-sized laminated card provides detailed information on the Surviving Sepsis Campaign guidelines to help you diagnose and treat patients with SIRS and SEPSIS. This card includes definitions for SIRS, SEPSIS, severe SEPSIS, and organ dysfunction.

Model 4204

MSRP	10-49	50-99	100+
\$6.95	\$5.90	\$5.55	\$5.20

2 H&P Card and Sheet

Useful for organizing a History and Physical Exam with Subjective and Objective data; includes all sections for conducting a patient history and performing all areas of the Exam.

3-hole Sheet Model 4107

Card Model 4106

MSRP	10-49	50-99	100+
\$4.99	\$4.25	\$4.00	\$3.75

3 Immunization Card Set

Laminated pocket card set with current recommendations for routine vaccines for all age groups in the US. The recommended immunization schedules have been approved by the Advisory Committee on Immunization Practices and are a quick easy pocket reference.

Model 4202

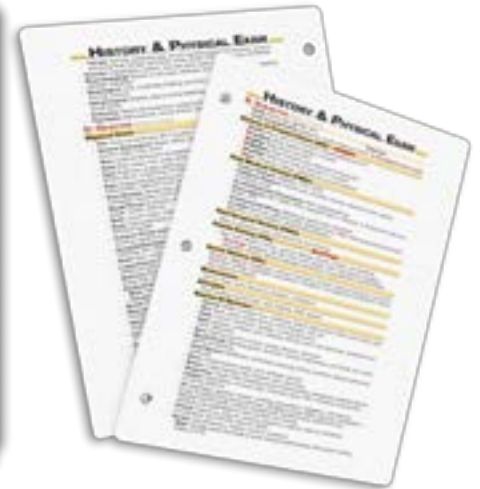

MSRP	10-49	50-99	100+
\$8.95	\$7.60	\$7.15	\$6.70

4 Cardiac Medications and Pressors Card

The Cardiac Medications card is a double-sided reference with detailed information on cardiac pressors, beta blockers, calcium channel blockers, and vasodilators. Reference each cardiac medications action within the body and on which receptors it interacts.

Model 4208

MSRP	10-49	50-99	100+
\$9.99	\$8.50	\$7.99	\$7.50

All of our cards and card packs are available with optional hole punching and card rings for an additional \$1.25

Respiratory WhiteCoat Clipboards

WhiteCoat Clipboards

Oxygen Systems

O ₂ System	Flow (L/min)	% O ₂ (FiO ₂)	H	Note
Bag-Valve Mask (20L, 200)	15	100% with reservoir	N	For manual ventilation of nonbreathing patients
Nasal Cannula	1-6	24-44	A/CPD	Low flow can be drying to nose and mucosa
Nose-Oral Mask	6-15	50-90	N	High %; one-way flap opens/closes to prevent rebreathing of CO ₂ and deliver high concentrations of O ₂
Oxygenator	1-10	30-90	N	Less drying than nasal cannula
Simple Mask	6-10	30-55	N	Higher %; lateral perforations allow exhaled CO ₂ escape
Simple Mask with Reservoir	6-10	30-55	N	Placed over mouth or attached to tracheal tube, face mask, and nasopharyngeal airway
Mask (Non-Reservoir)	6-10	24-50	A	
Mask (Reservoir)	6-10	24-50	B	Prevents dilation of oxygen; graduated dial is set to desired oxygen %

Flow Rates for Oxygen Systems

- Use flow rate (adding) with masks except nasal masks (try low flow)
- Nasal cannula: 1 L/min at the mouth
- Oxygenator: 15 L/min at the mouth
- Nasal cannula require humidity per patient comfort
- TIOL must always have humidity

Normal Acid-Base Values

Normal arterial pH range: 7.35 - 7.45 (7.40)
 Normal arterial PaCO₂ range: 35 - 45 mmHg (40 mmHg)
 Normal serum CO₂ range: 22 - 28 mEq/L (24 mEq/L)
 serum CO₂ on ABG (most cases) is the total CO₂ if represents the compensation

Spirometry

"Breathe normally"
 "Breathe in as deeply as you can"
 "Breathe out as hard and as long as you can"

WEANING PROTOCOL FOR INTUBATED PATIENTS

Screen 1: All patients requiring mechanical ventilation are assessed by using Screen 1 every day

- Mechanically stable?
- Off medications?
- PaO₂/FIO₂ ratio > 150? (if ABG not available: SaO₂ > 90% on FIO₂ of 0.5 or less)
- PEEP set at 5 cmH₂O or less?
- RASS at -2 or higher?

YES TO ALL → **IF NO to any question, STOP! Otherwise, ALWAYS proceed to Screen 2**

Screen 2: Rapid Shallow Breathing Index (RSBI)

A 1 minute test through ventilator with "low trigger" mode rate set to 6, PEEP set to 5. PEEP allowed up to 5 cmH₂O. Measure after 1 minute respiratory rate and tidal volume.

RSBI calculation = RR/Tidal volume (L)

respiratory rate / (L tidal volume (L))

RSBI < 105

- RSBI < 105 predicts a successful EOT and ventilator weaning
- RSBI > 105 predicts a higher probability of failing a weaning test
- 105 remains the most widely accepted cutoff value for intubated patients

Spontaneous Breathing Trial (SBT)

Spontaneous breathing for 120 minutes through ventilator with "low trigger" mode rate set to 6, PEEP set to 5, PEEP allowed up to 5 cmH₂O. A 2-hour continuous trial without termination indicates a successful spontaneous breathing trial.

Successful spontaneous breathing trial?
 Yes - discuss with Pulmonary Physician for extubation
 No - restart from Screen 1 after period of rest (usually 24 hours)

Termination Criteria:

- Respiratory rate > 30/min for 5 minutes or more
- SpO₂ < 90%
- Heart rate > 110/min, or sustained increase 20% greater than baseline
- Respiratory blood pressure > 160 mmHg or < 60 mmHg
- Increased anxiety
- If spontaneous breathing trial is unsuccessful, restart from Screen 1 after 24-hour rest

Available Color Models:

iPad Mini Version

Carry patient respiratory assessment forms, ventilator logs, medication lists, and all your documentation in a HIPAA secure clipboard.

Features:

- Spirometry assessment with COPD criteria
- Rapid Swallow Breathing Index
- Ventilator weaning
- Acid-base assessment
- Oxygen systems and flow rates
- Classification of severity of lung disease

Pediatric-Infant WhiteCoat Clipboards

Standard Version

Vertical Version

iPad Mini Version

Available Color Models:

Make your clipboard a quick medical reference guide with detailed day-to-day information specific for pediatric and infant healthcare professionals.

Features:

- APGAR scores
- Modified Glasgow Coma Scales for infants and children
- Age-specific averages for respiratory rate and blood pressure
- Daily fluid requirements
- Glucose infusion rate
- Phototherapy guidelines
- Umbilical artery and venous catheter distances

Periodic Table of Elements

WhiteCoat Clipboards.com
800-490-4621

Our WhiteCoat Clipboard Chemistry Edition is ideal for all laboratory environments to hold your experiments, equations, and notes. With a standard periodic table and standard equations you'll have it all with this folding patented clipboard. This clipboard is built to withstand the harshest laboratory environments with a strong sturdy design and chemical resistant informational labels to protect your investment and documents.

Features:

- Laminated scientific labels can withstand harsh cleaning chemicals
- Periodic table source: IUPAC, Royal Society of Chemistry 2015
- Standard equations and conversions

CUSTOMIZE OUR PRODUCTS TO FIT YOUR NEEDS

MDPOCKET® MEDICAL REFERENCE GUIDES

MDpocket® books can be easily customized for your program. Base your book on one of our existing editions or create your own book from our library of medical information chapters.

- Design your own cover or let us personalize one for you with student names or your program's logo
- Add specific program information such as:
 - Academic calendars
 - Department, staff, student, and resident numbers
 - Guidelines and rotation information

WHITECOAT CLIPBOARD LABELS

WhiteCoat Clipboards® are customizable as well - add custom information, medical notations or even your logo on your label. We can even create an entirely new label for your specialty with your help. All you need to do is supply us with the information you'd like to use and our design team will format it for your custom label.

CLIPBOARD CLIPS

Almost all of our clipboards can be upgraded with different clips. We offer many styles of clips as well as colored and decorated versions. Call us to change clips on any order of clipboards for just \$1.50 per clipboard!

STANDARD CLIP OPTIONS

VERTICAL & MINI CLIP OPTIONS

CLIPBOARD ENGRAVING

Personalize our powdercoated clipboards by adding an engraving - we can engrave custom text like names or even logos and designs. Our high-quality indelible laser engravings are a great way to tailor clipboards for your needs with names or even logos, call for quotations.

Call us today at 303-353-1165 to create a fully customized book or clipboard for your school, program, or students!
